12 Lecture - MGT401

Important Mcqs

- 1. Which of the following is not a commonly used inventory valuation method?
 - a) FIFO
 - b) LIFO
 - c) Specific identification
 - d) Random selection

Answer: d) Random selection

- 2. Under which inventory valuation method is the cost of the most recently purchased items used to value inventory?
 - a) FIFO
 - b) LIFO
 - c) Weighted average cost
 - d) Specific identification

Answer: b) LIFO

- 3. Which of the following is true of the FIFO inventory valuation method?
 - a) It results in the highest cost of goods sold during times of rising prices.
 - b) It results in the lowest net income during times of rising prices.
 - c) It results in the highest gross profit during times of rising prices.
 - d) It is not affected by changes in inventory levels.

Answer: c) It results in the highest gross profit during times of rising prices.

- 4. Which inventory valuation method assumes that the first items purchased are the first ones sold?
 - a) FIFO
 - b) LIFO
 - c) Specific identification
 - d) Weighted average cost

Answer: a) FIFO

- 5. Which inventory valuation method results in a higher ending inventory value during times of rising prices?
 - a) FIFO
 - b) LIFO
 - c) Weighted average cost
 - d) Specific identification

Answer: a) FIFO

- 6. Under the weighted average cost inventory valuation method, how is the weighted average cost calculated?
 - a) By dividing the total cost of inventory by the total number of units.
 - b) By adding the cost of the most recently purchased units to the existing inventory cost.
 - c) By multiplying the cost per unit by the number of units sold.
 - d) By subtracting the cost of goods sold from the total cost of inventory.

Answer: a) By dividing the total cost of inventory by the total number of units.

- 7. Which inventory valuation method allows for the use of specific costs for specific units of inventory?
 - a) FIFO
 - b) LIFO
 - c) Weighted average cost
 - d) Specific identification

Answer: d) Specific identification

- 8. Which inventory valuation method is most commonly used for tax purposes in the United States?
 - a) FIFO
 - b) LIFO
 - c) Weighted average cost
 - d) Specific identification

Answer: b) LIFO

- 9. Which inventory valuation method is most commonly used for financial reporting purposes?
 - a) FIFO
 - b) LIFO
 - c) Weighted average cost
 - d) Specific identification

Answer: a) FIFO

- 10. How does the choice of inventory valuation method impact a company's financial statements?
 - a) It does not impact the financial statements.
 - b) It can impact the cost of goods sold and net income.
 - c) It can impact inventory levels reported on the balance sheet.
 - d) It can impact the company's cash flow statement.

Answer: b) It can impact the cost of goods sold and net income.
