

22 Lecture - CS304

Important Mcqs

1. **Inheritance in C can be implemented using:**

- a) Structures and function pointers
- b) Classes and objects
- c) Inheritance keyword
- d) None of the above

Answer: a) Structures and function pointers

Which of the following is not a type of inheritance?

- a) Single inheritance
- b) Multiple inheritance
- c) Hierarchical inheritance
- d) Parallel inheritance

Answer: d) Parallel inheritance

The derived class inherits:

- a) All the properties and methods of the base class
- b) Only the properties of the base class
- c) Only the methods of the base class
- d) None of the above

Answer: a) All the properties and methods of the base class

What is the syntax to define a derived structure in C?

- a) `struct Derived : Base {}`
- b) `struct Derived extends Base {}`
- c) `struct Derived : public Base {}`
- d) `struct Derived : private Base {}`

Answer: c) `struct Derived : public Base {}`

Inheritance is used to:

- a) Achieve code reusability
- b) Encapsulate data
- c) Control access to data
- d) None of the above

Answer: a) Achieve code reusability

Which type of inheritance allows a derived class to inherit from multiple base classes?

- a) Single inheritance
- b) Multiple inheritance
- c) Hierarchical inheritance
- d) Hybrid inheritance

Answer: b) Multiple inheritance

Which keyword is used to call the constructor of the base class from the derived class

constructor?

- a) super
- b) base
- c) this
- d) parent

Answer: b) base

Which type of inheritance involves creating a new class that inherits from a base class, and then creating another class that inherits from the new class?

- a) Single inheritance
- b) Multiple inheritance
- c) Hierarchical inheritance
- d) Hybrid inheritance

Answer: c) Hierarchical inheritance

Which of the following is not a benefit of inheritance?

- a) Code reusability
- b) Improved maintainability
- c) Reduced coupling
- d) Increased code complexity

Answer: d) Increased code complexity

Which of the following is an example of polymorphism?

- a) Overriding a method in a derived class
- b) Calling a method from the base class
- c) Inheriting properties from a base class
- d) None of the above

Answer: a) Overriding a method in a derived class
