22 Lecture - CS304

Important Mcqs

1. Inheritance in C can be implemented using:

- a) Structures and function pointers
- b) Classes and objects
- c) Inheritance keyword
- d) None of the above

Answer: a) Structures and function pointers

Which of the following is not a type of inheritance?

- a) Single inheritance
- b) Multiple inheritance
- c) Hierarchical inheritance
- d) Parallel inheritance

Answer: d) Parallel inheritance

The derived class inherits:

- a) All the properties and methods of the base class
- b) Only the properties of the base class
- c) Only the methods of the base class
- d) None of the above

Answer: a) All the properties and methods of the base class

What is the syntax to define a derived structure in C?

- a) struct Derived : Base {}
- b) struct Derived extends Base {}
- c) struct Derived : public Base {}
- d) struct Derived : private Base {}

Answer: c) struct Derived : public Base {}

Inheritance is used to:

- a) Achieve code reusability
- b) Encapsulate data

c) Control access to data

- d) None of the above
- Answer: a) Achieve code reusability

Which type of inheritance allows a derived class to inherit from multiple base classes?

- a) Single inheritance
- b) Multiple inheritance
- c) Hierarchical inheritance
- d) Hybrid inheritance

Answer: b) Multiple inheritance

Which keyword is used to call the constructor of the base class from the derived class

constructor?

- a) super
- b) base
- c) this
- d) parent

Answer: b) base

Which type of inheritance involves creating a new class that inherits from a base class, and then creating another class that inherits from the new class?

a) Single inheritance

b) Multiple inheritance

- c) Hierarchical inheritance
- d) Hybrid inheritance

Answer: c) Hierarchical inheritance

Which of the following is not a benefit of inheritance?

a) Code reusability

b) Improved maintainability

c) Reduced coupling

d) Increased code complexity

Answer: d) Increased code complexity

Which of the following is an example of polymorphism?

- a) Overriding a method in a derived class
- b) Calling a method from the base class
- c) Inheriting properties from a base class

d) None of the above

Answer: a) Overriding a method in a derived class
