

13 Lecture - CS408

Important Mcqs

What is the primary function of a computer's central processing unit (CPU)?

- a) Storing data
- b) Displaying output
- c) Executing instructions
- d) Providing power

Solution: c) Executing instructions

Which of the following is an example of an output device?

- a) Keyboard
- b) Monitor
- c) Mouse
- d) Printer

Solution: b) Monitor

What is the purpose of an operating system in a computer?

- a) Managing hardware resources
- b) Storing data
- c) Creating graphics
- d) Processing input

Solution: a) Managing hardware resources

Which of the following is a type of secondary storage device?

- a) RAM
- b) CPU

c) Hard disk drive

d) Motherboard

Solution: c) Hard disk drive

What is the role of a mouse in human-computer interaction?

a) Input device

b) Output device

c) Storage device

d) Processing device

Solution: a) Input device

Which of the following is an example of a programming language?

a) Microsoft Word

b) Python

c) Photoshop

d) Google Chrome

Solution: b) Python

What is the purpose of an input device in a computer?

a) Displaying output

b) Storing data

c) Providing power

d) Collecting data from users

Solution: d) Collecting data from users

Which of the following is an example of system software?

a) Web browser

b) Word processor

c) Operating system

d) Video game

Solution: c) Operating system

What is the function of random access memory (RAM) in a computer?

a) Permanent storage of data

b) Processing data

c) Executing instructions

d) Displaying output

Solution: b) Processing data

What is the purpose of a graphic card in a computer?

a) Providing power

b) Storing data

c) Displaying graphics

d) Collecting data

Solution: c) Displaying graphics
