

26 Lecture - CS403

Important Mcqs

1. Which category of SQL commands is used to define and modify database objects such as tables and indexes?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: B

Which category of SQL commands is used to manipulate data in database objects?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: A

Which category of SQL commands is used to control access to the database?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: C

Which category of SQL commands is used to manage transactions and ensure data consistency?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: D

Which SQL command falls under the DDL category?

- A. SELECT
- B. UPDATE
- C. INSERT
- D. CREATE

Answer: D

Which SQL command falls under the DML category?

- A. ALTER
- B. DELETE
- C. DROP
- D. GRANT

Answer: B

Which SQL command falls under the DCL category?

- A. UPDATE

- B. REVOKE
- C. INSERT
- D. DELETE

Answer: B

Which SQL command falls under the TCL category?

- A. COMMIT
- B. SELECT
- C. WHERE
- D. FROM

Answer: A

Which SQL command is used to create a new table in a database?

- A. INSERT
- B. UPDATE
- C. DELETE
- D. CREATE

Answer: D

Which SQL command is used to add a new row of data to an existing table?

- A. DELETE
- B. INSERT
- C. UPDATE
- D. ALTER

Answer: B
