26 Lecture - CS403

Important Mcqs

- 1. Which category of SQL commands is used to define and modify database objects such as tables and indexes?
 - A. Data Manipulation Language (DML)
 - B. Data Definition Language (DDL)
 - C. Data Control Language (DCL)
 - D. Transaction Control Language (TCL)

Answer: B

Which category of SQL commands is used to manipulate data in database objects?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: A

Which category of SQL commands is used to control access to the database?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: C

Which category of SQL commands is used to manage transactions and ensure data consistency?

- A. Data Manipulation Language (DML)
- B. Data Definition Language (DDL)
- C. Data Control Language (DCL)
- D. Transaction Control Language (TCL)

Answer: D

Which SQL command falls under the DDL category?

- A. SELECT
- B. UPDATE
- C. INSERT
- D. CREATE

Answer: D

Which SQL command falls under the DML category?

- A. ALTER
- **B. DELETE**
- C. DROP
- D. GRANT

Answer: B

Which SQL command falls under the DCL category?

A. UPDATE

- **B. REVOKE** C. INSERT D. DELETE Answer: B

Which SQL command falls under the TCL category?

- A. COMMIT
- **B. SELECT**
- C. WHERE
- D. FROM
- Answer: A

Which SQL command is used to create a new table in a database?

- A. INSERT
- B. UPDATE
- C. DELETE
- D. CREATE
- Answer: D

Which SQL command is used to add a new row of data to an existing table?

- A. DELETE
- **B. INSERT**
- C. UPDATE
- D. ALTER
- **Answer: B**
