

33 Lecture - CS403

Important Mcqs

1. **Which of the following is not a consideration when designing an input form?**

- a) User needs
- b) Interface design principles
- c) Number of fields
- d) Security measures

Answer: c

What is the purpose of clear labels in an input form?

- a) To make the form look more attractive
- b) To confuse the user
- c) To provide guidance to the user
- d) None of the above

Answer: c

Which of the following should be provided for form fields where necessary?

- a) Validation
- b) Error messages
- c) Both a and b
- d) None of the above

Answer: c

What is the benefit of optimizing an input form for mobile devices?

- a) Increased user engagement
- b) Improved accessibility
- c) Higher conversion rates
- d) All of the above

Answer: d

What is the purpose of security measures in an input form?

- a) To protect user data
- b) To make the form look more professional
- c) To slow down form submission
- d) None of the above

Answer: a

Which of the following is not a principle of interface design?

- a) Consistency
- b) Simplicity
- c) Complexity
- d) Clarity

Answer: c

What is the purpose of appropriate sizing and spacing of form fields?

- a) To make the form look more attractive

- b) To improve usability
- c) To confuse the user
- d) None of the above

Answer: b

Which of the following is not a benefit of a well-designed input form?

- a) Improved user experience
- b) Increased accuracy of data collection
- c) Decreased loading time
- d) All of the above

Answer: c

Which of the following should be optimized in an input form for accessibility?

- a) Color contrast
- b) Font size
- c) Keyboard accessibility
- d) All of the above

Answer: d

What is the benefit of providing real-time feedback on form submission?

- a) Increased user engagement
- b) Improved user experience
- c) Higher conversion rates
- d) All of the above

Answer: d
