33 Lecture - CS403

Important Mcqs

- 1. Which of the following is not a consideration when designing an input form?
 - a) User needs
 - b) Interface design principles
 - c) Number of fields
 - d) Security measures
 - Answer: c

What is the purpose of clear labels in an input form?

- a) To make the form look more attractive
- b) To confuse the user
- c) To provide guidance to the user
- d) None of the above

Answer: c

Which of the following should be provided for form fields where necessary?

- a) Validation
- b) Error messages
- c) Both a and b
- d) None of the above

Answer: c

What is the benefit of optimizing an input form for mobile devices?

- a) Increased user engagement
- b) Improved accessibility
- c) Higher conversion rates
- d) All of the above

Answer: d

What is the purpose of security measures in an input form?

- a) To protect user data
- b) To make the form look more professional
- c) To slow down form submission
- d) None of the above
- Answer: a

Which of the following is not a principle of interface design?

- a) Consistency
- b) Simplicity
- c) Complexity
- d) Clarity
- Answer: c

What is the purpose of appropriate sizing and spacing of form fields?

a) To make the form look more attractive

b) To improve usability

c) To confuse the user

d) None of the above

Answer: b

Which of the following is not a benefit of a well-designed input form?

- a) Improved user experience
- b) Increased accuracy of data collection
- c) Decreased loading time
- All of the above

Answer: c

Which of the following should be optimized in an input form for accessibility?

- a) Color contrast
- b) Font size
- c) Keyboard accessibility
- All of the above

Answer: d

What is the benefit of providing real-time feedback on form submission?

- a) Increased user engagement
- b) Improved user experience
- c) Higher conversion rates
- d) All of the above

Answer: d
